

Barton County

Estimated Economic Impact of Agriculture, Food, and Food Processing Sectors 10/3/14

12 agriculture, food, and food processing sectors were analyzed to determine their overall contribution to the Barton County economy.¹

These 12 sectors have a total direct output of approximately \$780 million and support 1,660.1 jobs in Barton County. Running the model for all 12 sectors simultaneously produces the following results:

Agriculture Contribution in Barton Co									
Impact Type ²	Employment	%	Total Value	% of Gross	Output ⁵	% of Gross			
		Employment	Added ³	Regional		Regional			
				Product ⁴		Product			
Direct Effect	1,660.1	8%	140,120,293.8	10%	780,174,591.0	56%			
Indirect									
Effect	505.7	2%	56,532,517.4	4%	92,558,465.3	7%			
Induced									
Effect	422.6	2%	30,717,624.6	2%	48,019,034.3	3%			
Total Effect	2,588.3	12%	227,370,435.9	16%	920,752,090.7	66%			

As shown in the above table, agriculture, food, and food processing supports 2,588.3 jobs, or 12% of the entire workforce in the county. These industries provide a total economic contribution of approximately \$921 million, roughly 66% of Gross Region Product (GRP). As noted below in the calculation of Gross Regional Product, imports and institutional sales are subtracted. Therefore, counties that import a relatively large amount of goods and services will have a reduced GRP which may lead to agricultural output being greater than GRP.

Another metric used to calculate the importance of sectors in an economy is their value added as a percentage of GRP. Total value added by the 12 agriculture, food, and food processing sectors is approximately \$227 million, or 16% of the GRP. This indicates that personal income, business income, and taxes generated by these sectors account for 16% of the total economy.

¹ Article on building a contribution analysis in IMPLAN that avoids double counting: http://www.implan.com/index.php?option=com_content&view=article&id=660%3A660&catid=253%3AKB33&Itemid=70

² Direct, indirect, and induced effects sum together to estimate the total economic contribution in the state. **Direct effects** capture the contribution from agricultural and food products. **Indirect effects** capture the economic benefit from farms and agricultural businesses purchasing inputs from supporting industries within the state. **Induced effects** capture the benefits created when employees of farms, agricultural businesses, and the supporting industries spend their wages on goods and services within the state.

³ Value added = labor income + indirect business taxes + other property type income.

⁴ GRP = final demand of households + governments expenditures + capital + exports - imports - institutional sales.

⁵ Output = intermediate inputs + value added.

The following tables document the overall summary numbers of the model, top industries affected by employment and output, and a listing of all industries that were analyzed.

In the top ten by employment, Grain farming is the top employer in the agriculture industry with 462.5 employees. This table also shows the amount of jobs that are created by the agriculture industry in Barton County.

Description	Total Employment	Total Output
Grain farming	462.5	69,918,583.6
Cattle ranching and farming	420.9	171,406,826.4
Dog and cat food manufacturing	370.2	470,191,778.7
Support activities for agriculture and forestry	267.5	229,787.3
Wholesale trade businesses	135.5	27,129,206.2
Food services and drinking places	79.2	4,404,661.9
Transport by truck	64.1	10,578,335.2
Monetary authorities and depository credit intermediation activities	58.8	19,864,572.3
Animal production, except cattle and poultry and eggs	41.0	5,401,629.9
Private hospitals	38.8	5,340,057.6

The Dog and cat food manufacturing industry directly contributes approximately \$470 million to Barton County's economy. This table also shows how much revenue is generated in other industries by having a strong agriculture industry.

Description	Total Employment	Total Output
Dog and cat food manufacturing	370.2	470,191,778.7
Cattle ranching and farming	420.9	171,406,826.4
Grain farming	462.5	69,918,583.6
Wholesale trade businesses	135.5	27,129,206.2
Other animal food manufacturing	14.2	20,810,825.1
Monetary authorities and depository credit intermediation activities	58.8	19,864,572.3
All other crop farming	19.8	18,811,695.8
Transport by truck	64.1	10,578,335.2
Electric power generation, transmission, and distribution	14.7	10,563,714.1
Oilseed farming	23.6	9,867,269.7

Below is a summary of all agriculture data with employment levels and output level. These values can tell how many jobs are represented by each agriculture sector and the output they contributed to Barton County's economy.

Oilseed farming Grain farming Greenhouse, nursery, and floriculture production	23.58 462.53 0.30	9,735,733.03 68,986,526.49
Grain farming	0.30	68,986,526.49
	10.02	363,059.67
All other crop farming	19.82	18,560,924.53
Cattle ranching and farming	420.91	169,117,492.68
Dairy cattle and milk production	6.67	3,465,630.29
Animal production, except cattle and poultry and eggs	41.00	5,329,484.94
Commercial logging	2.51	150,985.40
Support activities for agriculture and forestry	267.50	220,495.30
Dog and cat food manufacturing	370.21	463,087,280.27
Other animal food manufacturing	14.23	20,496,377.94
Animal (except poultry) slaughtering, rendering, and processing	30.81	9,285,526.28

All 105 counties in Kansas have Implan models and agriculture contribution summary. These values do not factor in the retail environment of food sales. Food retail is important, but in order to provide the most accurate picture of what production agricultural and processing contributes to Kansas, the retail sector was omitted.
